Can you help Mark solve this biology brain teaser?

*This thing's not a human body  
But it often has some veins  
It falls from a deciduous  
On evergreens it remains*

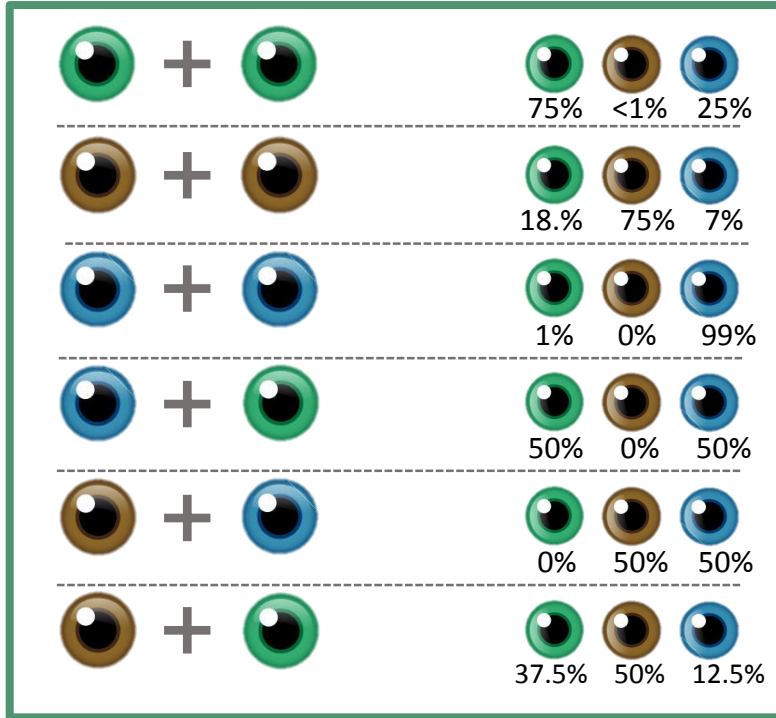

I'm having a real tough time working this riddle out. Can anyone *photo-sympathise* with me and help to solve it?

Reply with your answer

Hannah is looking at genetics today and working out her chances of being born with different eye colours. 'W'eye' don't you have a go!

\_\_\_\_\_ % I was going to have **brown** eyes

\_\_\_\_\_ % I was going to have **green** eyes

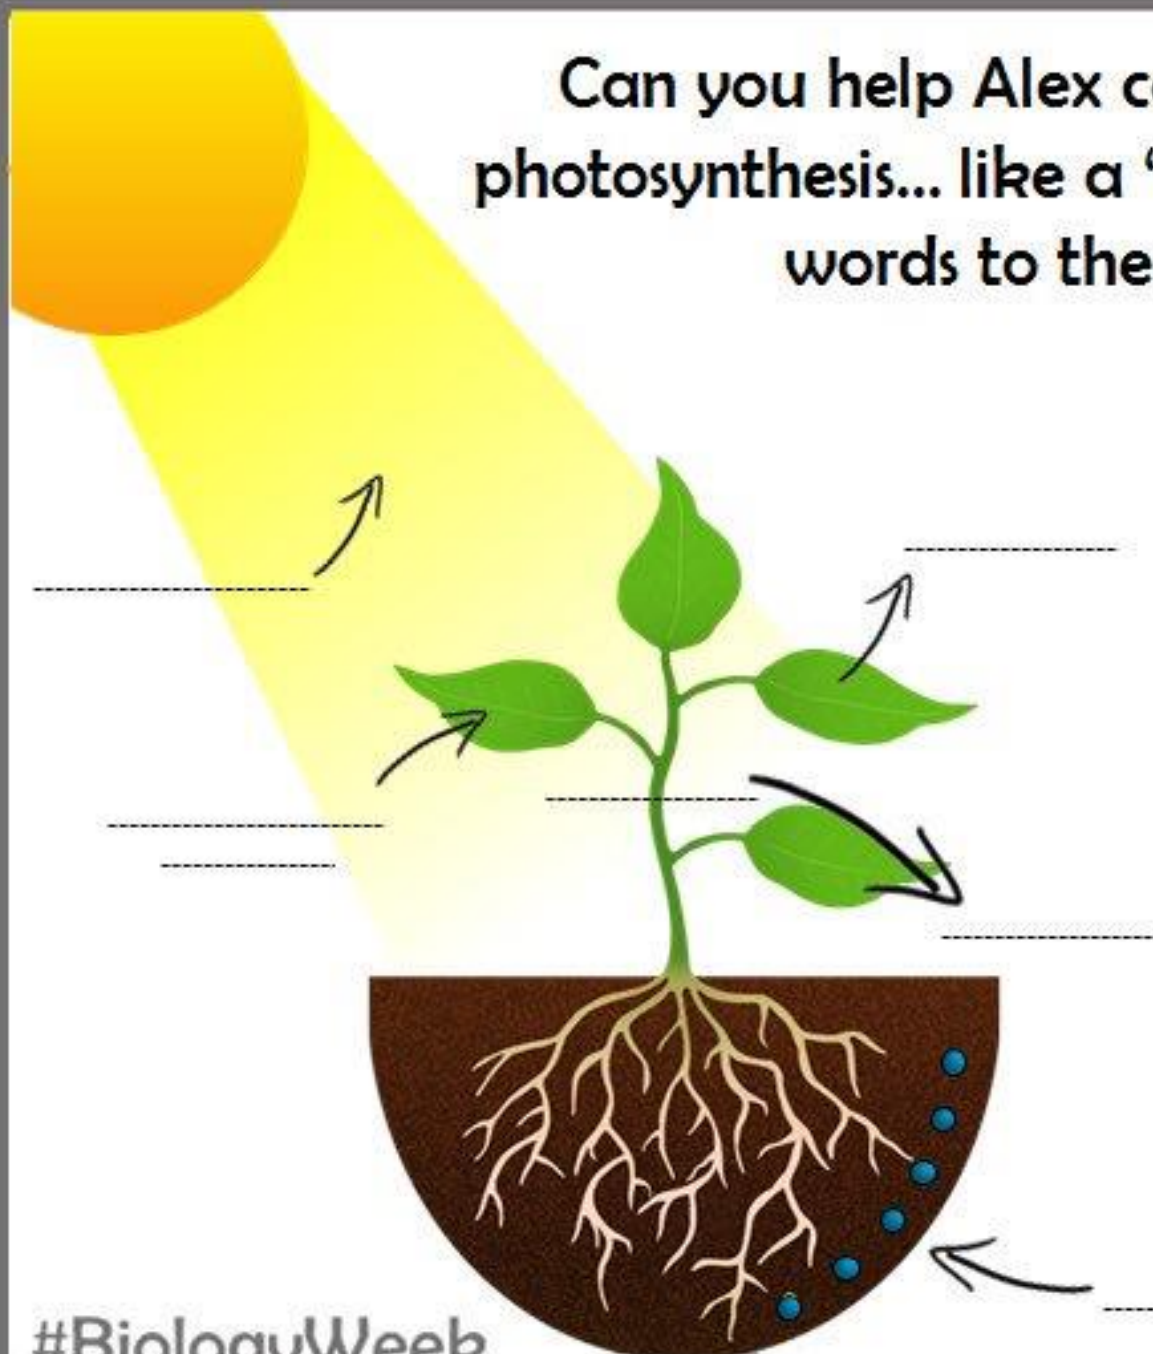

\_\_\_\_\_ % I was going to have **blue** eyes

Eye worked out that there was a 75% chance that I was going to have brown eyes.

Did you fall in with the average or beat the odds?

Can you help Alex complete this diagram on photosynthesis... like a '*moss*'? Match the following words to the diagram below.

A teacher with dark hair is standing at a wooden podium, pointing upwards. To her left is a green chalkboard with a wooden frame. On the chalkboard, the following items are listed in white cursive text:

- Sunlight
- Water
- Oxygen
- Carbon Dioxide
- Chlorophyll
- Glucose
