

Topical Science Activity - Mystery Objects

Learning Outcome:

Identify the mystery objects

Resources:

- Image cards
- Objects (if available)

What to do:

1. Present learners with the mystery object cards or objects.
2. Ask learners to examine each image and say what they think each object is.
3. Justify answers,
4. Check answers on the back of each image.

Topical Science Activity - Mystery Objects

I can talk about science stories to develop my understanding of science and the world around me.

SCN 0-20a

- *Explores, through role-play, how science and science skills are used in a variety of jobs.*

I have contributed to discussions of current scientific news items to help develop my awareness of science.

SCN 1-20a

- *Discusses how people use science in their everyday lives.*
- *Creates and Justifies a solution to a given design challenges considering who is it for, where and how it will be used.*
- *Uses appropriate tools and joining methods to construct a model.*

Topical Science Activity - What am I?

Learning Outcome:

Identify the magnified objects

Resources:

- Image cards

What to do:

1. Present learners with the magnified image cards.
2. Ask learners to examine each image and share what they think each object is.
3. Justify answers,
4. Check answers on the back of each image.
